Joint DESY and University of Hamburg Accelerator Physics Seminar

Tuesday, January 13-th, 2009

(16:00 in Room 459/30b)

Beta-Beams at DESY ?
(two presentations)

Achim Stahl & **Elena Wildner**
RWTH Aachen | CERN

Abstract
An idea on the generation of high intensity neutrino beams for the search for CP violation will be presented. The general concepts of such a facility will be explained. Moreover, it will be explained why DESY could be an optimal site for such a facility and how existing DESY accelerators and infrastructure could be employed.

D.P.Barber (MPY), J.Roßbach (Univ. HH) and M.Vogt (MPY).
