(16:00 in Room 459/30b)

General Overview of The TAC Project

Metin Aydar, Hatice Yılmaz, Ayşegül Usun

Ankara University, Ankara, Turkey

Abstract

The purpose of the TAC (Turkish Accelerator Center) Project is to provide a contact of our country with accelerator technologies and to coordinate R&D activities based on this technology. The Turkish Accelerator Center, where fundamental and applied science based on accelerator research can be studied, will be started in 2012 in Ankara, Turkey and the TAC Project will be completed in the 2020s. The first part to be established between 2008-2011 will be the IR FEL laboratory. The project is supported by the State Planning Organisation (SPO) of Turkey and is proceeded with inter university collaboration under the coordination of Ankara University. There are also collaborations with international laboratories and institues.

J.Roßbach (Univ. HH) and M.Vogt (MPY).
